A Greener & Greater outlook...

Because we welcome thousands of guests to stay with us each year, we place great importance and responsibility on balancing people & planet with profit.

Our B Corp certification is testament to this, and although this is applicable to us as a company (and not our individual escapes), we ensure that we share, promote & inspire best practices with both our guests, and our owners to help plant seeds for greener & greater escapes.

Being an NFE host, you can expect...

- Bespoke guides - we have created a range of bespoke resources for hosts, identifying practical and useful ways that you can integrate and introduce eco-friendly attributes in your home. Follow the QR code above for more info on things like Eco-tech, setting up a greener holiday home & great eco-cleaning products you can find on our website.

- Inclusion/Promotion within our eco collection - no two escapes are the same, so whether you are in the swing of all things green, or are just starting out- we're on-hand to offer practical help and guidance about how to be more planet-friendly. We will ask you to fill out our Eco Survey so that we can showcase your green credentials throughout your listing.

- Subsidised Garden Audits - by partnering with The Bumblebee Conservation Trust, we are pleased to offer our hosts a subsidised annual garden audit whereby you will be given specialist advice about how to make your outdoor space a pollinator's paradise and help with biodiversity. Please email hello@newforestescapes.com to get your own audit.

- Informed Guests - our all-local team talk to each and every guest, sharing the best places to eat, drink and be merry during their stay whilst also helping to support the community. We also populate Touchstay (our digital guidebook) with practical information about how guests can make themselves at home, and consider efficiencies whilst doing so.

- Spreading the Word - we use our social platforms to share top tips, news, and best practices - ensuring that 'green' based info is shared regularly.

- Annual Impact Report - as part of our B Corp accreditation, we publicly relay the year's developments, and create an impact report of things that we have achieved, and things that we could do better with. As ever, this transparent approach is aimed at re-evaluating our progress, whilst encouraging change throughout the industry.
